

Alfredo T. Carbonilla Jr.

 carbonillaalfredo@gmail.com |  github.com/acarbonilla |  Lapu-Lapu City, Philippines

Professional Summary

Versatile **IT Specialist & Junior Full-Stack Developer** with **10+ years** in technical support, systems administration, and scalable web application development. Proven in **end-to-end IT operations, Azure/Intune migrations Support, VoIP deployments, office relocations, and asset lifecycle management**. Built production-grade systems using **Python, Django, React, and Tailwind CSS**, enhanced by **AI-assisted development** (ChatGPT, Cursor, DeepSeek). Passionate about **automating workflows, boosting uptime**, and delivering **user-centric solutions** that drive efficiency and compliance.

Technical Skills

Category	Technologies & Tools
Backend	Python, Django, DRF, JWT, MVT
Frontend	React (incl. React Native), Tailwind CSS, Axios
DevOps & Tools	Git/GitHub, QR/Barcode Integration, System Monitoring
IT Systems & Support	Performance Optimization, Root Cause Analysis, Hardware Integration, Remote Diagnostics, TCP/IP, Data Recovery
Cloud & MDM	Azure AD, Intune, Office 365, OneDrive KFM
Networking & VoIP	Cisco VoIP, SIPX Voice Server, VLAN, SIP, Network Cabling
AI-Assisted Development	ChatGPT, Cursor, DeepSeek (code generation, refactoring, workflow optimization)

Portfolio Projects

All repositories include detailed README documentation

- **GeoTime** – GPS-based employee time tracking and workforce management system.
 - Geofencing validation for accurate location-based clock-in/out
 - Role-based dashboards and leave/overtime workflows

- Secure JWT authentication and responsive UI
 - **OMS – Operations Management System** – Multi-regional platform for facility operations across C2, Danao, and Mindanao.
 - Role-based access control (AM, EMP, EV groups)
 - QR code entry and camera integration for real-time image capture
 - Image comparison for activity validation and reporting
 - **GatePassPro** – Visitor management system for streamlined check-in processes.
 - Automated email invitations and real-time check-in/out
 - Role-based access and JWT-secured authentication
 - Analytics dashboard for visitor flow and security
 - **IAIS – Inventory and Asset Information System** – Django-based asset lifecycle and inventory management platform.
 - QR/barcode scanning for asset tracking
 - Real-time inventory updates and PDF/Excel exportable reports
-

Professional Experience

Technical Support Engineer L2

ActionLabs IT Services Phils. Corp., Quezon City

July 2017 – Present

- **2025:** Scaled 500+ laptop deployments across new sites via Autopilot; collected HWID, triggered enrollment, installed O365 post-setup—ensured 100% readiness.
- **2024:** CrowdStrike outage recovery; restored 150+ BSOD endpoints in <3 days via safe-mode fixes, driver rollback, and re-imaging.
- **2023:** Executed disposal of 300+ obsolete units; managed inventory, approvals, and 5S-compliant decommissioning.
- **2022:** Provisioned 120+ laptops for Azure AD & Intune enrollment; collected HWID/computer name from Backend Support, performed factory reset, triggered Autopilot deployment, and installed O365 post-enrollment—ensured clean, compliant handoff to end-users.
- **2021 Mar–May:** Delivered nationwide remote IT support across the Philippines via TeamViewer and AnyDesk; supported **300+ users** in **Philippines** during pandemic lockdown with high **customer satisfaction**.
- **2020 Q4:** Assisted provider in replacing damaged VoIP server; configured **50+ Cisco VoIP phones** (SIP registration, extension mapping)—completed full server + endpoint setup in **under 2 days**.
- **2020 Q1:** Provisioned **50 new desktops/laptops**; installed full software stack, joined to local AD, configured user profiles and GPOs—delivered ready-to-use in **under 72 hours per batch**.
- **2019:** Orchestrated disposal of **1,000+ obsolete/broken IT assets** across two batches; compiled inventory, secured Finance (asset valuation) and Facilities approvals, and

executed compliant decommissioning—directly supporting company-wide **5S compliance** and space optimization.

- **2018 Q2:** Deployed **Symantec Endpoint Protection** across **100+ endpoints** using SEPM for centralized management; optimized policies (Auto-Protect, IPS enabled) per best practices, minimizing disruptions via pre-install scans and exclusions—boosted endpoint security with **99% coverage in under two weeks**.
- **2018:** Rolled out **Office 365** for **100+ users** under **1-month audit deadline**; overcame data-loss fears via OneDrive, backups, and live demos—ensured **zero corruption** and **full compliance**.
- **2017 Q3:** Replaced legacy VoIP system; configured and deployed **50+ new IP phones** with call routing, voicemail, and IVR—completed rollout in **under 1 week** with zero call drops post-go-live.
- **2017:** As part of the onboarding team, joined **100+ desktops and 20+ laptops** to Active Directory domain; overcame data migration challenges by recovering user files/settings from old profiles and mapping to new AD accounts; installed/configured Outlook, Microsoft Teams, and LOB tools to ensure seamless user productivity.
- Delivered end-user support across diverse environments, ensuring seamless IT operations
- Monitored systems proactively and resolved issues to minimize downtime
- Conducted root cause analysis and implemented preventive measures
- Installed and maintained hardware/software, applied patches, and safeguarded data integrity
- Provided remote and on-site technical assistance, simplifying complex issues for non-technical users
- Contributed to internal process improvements and technical documentation

IT Technical Support Specialist

Blue Ocean BPO Inc., Cebu City

June 2013 – June 2016

- **2015:** Set up **50+ new desktops** for the affiliated company's new office; configured per client standards (OS, apps, security, networking)—ensured **100% compliance** and on-time launch.
- **2014:** Led IT setup for office migration; deployed workstations, structured cabling, switches, and access points—executed seamless cutover with **zero downtime** during business hours.
- **2013:** Collaborated on Active Directory (AD) domain recovery after server failure; assisted supervisor in configuring new AD server, manually joined **70+ workstations** to domain, and created/provisioned user accounts to restore network access.
- Diagnosed and resolved hardware, software, and network-related issues
- Performed malware/ransomware removal and system recovery
- Installed and configured computer systems and network infrastructure
- Tested and deployed new hardware/software for compatibility and performance

- Delivered high-quality support via phone and in-person channels

Freelance / Part-Time Web Application Developer

Self-Managed Projects

March 2025 – Present

- Designed and deployed full-stack web applications (**GeoTime, OMS, GatePassPro, IAIS**)
- Provided ongoing support, bug fixes, and feature enhancements
- Integrated AI tools (**ChatGPT, Cursor, DeepSeek**) to improve development speed and code quality
- Built systems with GPS validation, QR code access, visitor management, and asset tracking

Education

Bachelor of Science in Information and Communication Technology

Cebu Technological University – Main Campus, Cebu City

June 2010 – March 2014

Computer Hardware and Servicing II

ELE Technical Training Center & Recruitment Agency

November 2013 – February 2014

Online Training

- **Complete Django Course: Email, Messaging, Comments, APIs + Instructor: Dennis Ivy**
- **React 18 Course 2024 – Learn React JS the Fast Way Instructors: Jannick Leismann, Denis Panjuta**
